DETAILED ACTION

1. Claims 23-41 have been examined.

Papers Submitted

2. It is hereby acknowledged that the following papers have been received and placed of record in the file: Amendment as received on 4/12/2007.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 36-39 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

5. Referring to claim 36, the claim does not produce a tangible result because when the determining steps are not satisfied, the decoding and retrieving do not take place, and consequently, all that happens is determining. Determining alone does not produce a tangible result, and therefore, the claimed invention has no practical application.

The examiner recommends adding language that specifies what happens in response to said determining steps not being satisfied (i.e., a 3-bit register identifier is decoded, or some other similar language).

6. Referring to claims 37-39, the claims do not produce a tangible result for similar reasons set forth in the rejection of claim 36. Claims 37-39 provide more details on decoding and what is decoded, but do not produce a tangible result.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 41 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. Claim 41 recites the limitation "the decoder to decode an at least four-bit logical register identifier". There is insufficient antecedent basis for this limitation in the claim because there is no previous mention of a decoder for decoding an at least four-bit logical register identifier (due to applicant's deletion of language from claim 40).

Allowable Subject Matter

10. Claims 23-35 and 40 are allowed.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2183

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
